

Massey Tape-Head Saturation plug-in for Pro Tools

[Read the rave reviews at Gearslutz :\)](#)

Add a little saturation to your mix. Make your drums fuller & louder. Add some grit to vocals.

Like the vt3 EQ, Tape-Head supports both LE (RTAS) and TDM, including MIX, HD, and HD Accel. Supports Pro Tools 6 and higher.

Tape-Head also has an unlimited usage period and introduces no mutes or beeps in the audio.

Download the installer [here](#) for Mac OS X.
Download the installer [here](#) for Windows XP.

A full version is available with the additional features:

- 88.2kHz - 192kHz support
